

Dear Students!

Please find below the topics of cardiology lectures and practice rota in groups week by week in 2008/2009 1st Semester. All lectures are held in SE Heart Centre. Each week the groups will participate in a so called „general practice” or in a „common practice” (invasive cardiology, electrophysiology, non-invasive imaging, heart surgery, pediatric cardiology). The location of practices week by week are also in the schedule. We accept a maximum of 10 students in each groups.

Everybody is kindly invited to the lectures. To take part on practices is mandatory.

At the end of the semester a practical exam and a multiple choice test exam will be performed.

We wish you all a successful semester in the name of SE Heart Center!
